## Experience

### Studio Technical Lead

BETC Digital, Paris (France), Oct. 2015 - Present

Pre-sale: technical recommendation, budget, hosting infrastructure. Creative and commercial teams support.

Project setup: Design Reviews, technical documentation investigation (API, hosting, accessibility, 3rd party security policy...), final budget, PoC development, functional scope with project management teams, briefing of technical teams (Dev, Tech Consultants, freelancers, 3d part suppliers), client's technical point of contact.

Build and delivery: global follow-up (quality, process, tools), tech teams support and technical choices management.

Cross-projects: management of Studio technical teams (Dev, Technical Project Managers, Technical Consultants), industrialisation with CI/CD process and global documents (tech spec, browser support, hosting offers, GDPR guidance).

### Developer & Technical Consultant

Heaven, Paris (France), Aug. 2013 - Sept. 2015

Laravel & WordPress with custom plugins and automated installation/migration scripts.

Technological watch and proactive projects, such as the Social Box, a Social Wall based on a Raspberry Pi.

Work with project management/commercial team, 3rd part suppliers and clients, from strategic and UX recommendations to the development phase.

### Full-Stack Web Developer

Supergazol, Paris (France), Mar. 2010 - Jul. 2013

### Full-Stack Web Developer

Moon Websites, Paris (France), Oct. 2008 - Mar. 2010

### Creation and management of Xbox-360.fr (online magazine)

Xbox-360.fr, Metz (France), May 2005 - Feb. 2009

---

## Projects

### Pernod Ricard - Martell

International platform with headless WordPress & serverless statically generated Front-End.

<https://www.martell.com/en-ww/>

### LVMH - Rimowa Unique

3D configurator for Rimowa's luggages, coupled with Salesforce CC.

<https://www.rimowa.com/fr/en/unique/customize?PID=97253004>

### Bouygues Telecom - When the Internet is down

A website you can browse only when offline, thanks to Service Workers.

<https://whentheinternetisdown.com/>

### Air France - Questions in the Sky

Interactive experience with extensive use of WebGL. Also deployed in CDG Airport thanks to a dedicated Raspberry Pi (offline).
